Battery Charging:

Please put charging base against the wall, plug in adapter, and signal light on charging home base will flash.

Note: Put charging home base against the wall and remove obstacles about 1 meter distance at two sides and 2 meters ahead.Turn on the power switch on the bottom side of the robot, and then display indicator

will be in gradual blue,the robot is in standby. (If no command received,the robot will turn to sleeping mode

after 30 seconds.)

Note:

A. Please always keep the power switch turning on. If not, it is unable to make the robot work.
B. If power switch is turned off, all the scheduled operation will be lost.

C. Before charging the robot, please make sure the power switch is turned on, or else the robot can not be charged.

Charge the robot in either way as shown below:

1. Plug the adapter into the robot and the other end to the power socket as below on the left;
2. Press HOME button on remote controller to direct the robot to charging home base for charging.

Note:

- Make sure power switch at side of the robot is on before charging. Otherwise, **robot will have voice demonstration** to remind user to turn on it.
- During charging, robot control panel will indicates changing number of 11:11 and shown from left to right.
- After fully charged, the robot control panel will show FULL and also have voice demonstration. (Every charging will take around 4 hours).
- For first use, please run out of the power and then fully charge the robot.
- If the robot is not used for a long time, fully charge the battery, turn the power switch off, and remove the battery and store in a cool, dry place.

Note:

a. Wash HEPA filter after used for 15-30 days
b. Reinstall the HEPA and primary filter after they are fully dry.
c. Dust bin and filters (including HEPA and primary filter) could be replaced if needed.
d. Do not dry the filters under backing sunshine.
